

I am pleased to report that as of Thursday, February 12th the Town of Trinity (including Goose Cove) has high speed internet service. For those of you who still have basic cable there was an automatic upgrade with an few extra stations added at no extra cost. Digital cable packages are also available for extra cost. Works the same as satellite where you get to add various packaged channels for a fee to your basic package.

For more information I encourage you to visit the Eastlink website at the following address: <http://www.eastlink.ca/index.asp> to learn more about the various prices for high speed internet, cable and digital cable. There are also some special bundle deals available, one is called Watch and Surf. Links to all these sections are on the left side of Eastlink's website. I encourage you to browse and contact their customer service with any questions you may have or to book appointments to hook-up a service.

It has been a long battle to try and get this service here to the Town so I encourage you to support Eastlink now that they are providing this service to us. The task of arranging hook-ups to your individual homes and businesses is now up to you.

Sincerely,

Jim Miller  
Mayor
